Sports wear

The Trigema Sports socks with antibacterial silver content. These socks are odor-inhibiting and antifungal. They feature ankle, heel, and sole padding as well as air channels in the sole. These properties make these sports socks ideal for jogging and tennis, but also for walking and hiking. The biocidal active ingredient silver salt (CAS No. 7783-90-6) reduces the colonization and reproduction of microorganisms in the textile due to its antibacterial activity and prevents the development of odors.

- antibacterial
- odor-inhibiting
- anti.fungal
- electro-static discharging (ESD)

Material:

85% Cotton
14% Polyamid
01% **PA silver coated (beag® eYarn)**
